Summer Undergraduate Research Fellowship

http://surf-it.soe.ucsc.edu

June 22 - August 22, 2014

APPLICATIONS DUE FEBRUARY 15, 2014

The University of California, Santa Cruz (UCSC) Summer Undergraduate Research Fellowship in Information Technology (SURF-IT) offers summer research opportunities for UCSC and non-UCSC undergraduate students.

SURF-IT includes a research experience supervised by UCSC faculty in computer engineering, electrical engineering, and computer science. SURF-IT students have weekly meetings focused on graduate school preparation, presenting research results, research ethics, as well as field trips to neighboring Silicon Valley research laboratories such as IBM Almaden Research Center, and of course, a number of social activities!

Visit http://surf-it.soe.ucsc.edu to apply and for more information! Preferences are given to students entering their Junior or Senior year in Fall 2014.

The SURF-IT fellowship includes:

• A summer of exciting research
• $4500 Stipend
• Housing and meals on one of the nation’s most beautiful campuses
• Travel reimbursement to and from the program

SURF-IT especially encourages applications from students who are also members of a group underrepresented in engineering (e.g. low income, first generation higher education, Women, Native American, African American, Latino, or Pacific Islander). Applicants must be U.S. citizens or Permanent Residents.

This program is funded by the National Science Foundation under Grant No. 1156606. Visit www.nsf.gov for other REU opportunities.
