Getting Involved in Undergraduate Research

Rebecca Anderson, Ph.D.
Undergraduate Research Coordinator
Website: ugr.ucsc.edu
E-mail: rlanders@ucsc.edu

Sponsored by the Divisions of:
Undergraduate Education, Physical & Biological Sciences,
Research, and Baskin School of Engineering
Overview

• Define Undergraduate Research (UR)
• Explore the importance of UR to UCSC and to you
• Explore your research interests and goals
• Discuss resources for finding an opportunity
• Introduce Undergraduate Research (UR) Opportunities website
• Discuss how you can get involved
• Explore funding sources
• Discuss timelines
Undergraduate research is an inquiry or investigation conducted by an undergraduate student that makes an original intellectual or creative contribution to the discipline.

(www.cur.org)
UR in Each Division

- **Arts** - painting, theater/musical performance
- **Engineering** - game design, robotics for medical purposes
- **Humanities** - historical and linguistic analysis
- **Physical and Biological Sciences** - evolution of plants, geological analysis
- **Social Sciences** - child brain development, patterns of human migration
UR in Each Division

• Examples?
  • Arts
  • Engineering
  • Humanities
  • Physical & Biological Sciences
  • Social Sciences
Benefits for the University & Researcher

• Training the next generation of researchers
• Student characteristics:
  • Work hard
  • Energetic
  • Curious
  • Fresh perspective
  • Willing to do boring but necessary work
• Can help secure grant funding
Benefits to Students

- Participate in the university community
- Engage in the practice of your discipline
- Create knowledge, not just consume
- Complement coursework
- Help get into graduate school or job
- Career exploration
- Develop important traits: creativity, curiosity, ability to focus, verbal and written fluency, and respect for others’ contributions
Interests, Goals, & Practical Issues

- What classes/topics inspire you?
- What career involves your interests?
  - Does it require research training?
- What practical issues are there?
  - Do you have the time?
  - Do you need a paid position or credits?
  - Does the position require transportation?
Finding a Research Opportunity

• Networking
  • Friends, TAs, professors, etc.
  • Student groups
  • Informational interviews (CAN)
  • Ask at ACE, MEP, Advisers

• Web resources
  • UCSC UR webpage
  • Career Center
  • Databases (more later)
• Goals:
  • Assist UCSC undergraduates to get involved in research
  • Increase awareness of the important contributions of UCSC UR
  • Educate faculty, staff, prospective students, and the community about UR at UCSC
UNDERGRADUATE RESEARCH OPPORTUNITIES

APPLICATION DATES

October
- Frank and Sara McKnight Awards in Molecular Sciences due 10/1
- DOE SULI Internship application due for spring 2014, 10/1
- NIH Visit and Interviews for Seniors due 10/5
- Arts Division Irwin Project Grant due 10/17

EVENTS

- Joel Oppenheim, Ph.D.: Fall 2013 Undergraduate Professional Development Lunchtime Workshop Series
  Monday, October 7, 2013 12:30 PM to 1:45 PM
- April Goral: Graduate School Admission Process
  Tuesday, October 8, 2013 2:00 PM to 3:00 PM

STUDENT PROFILES

NEW PROFILE!

Eric Curiel (EEB) was recently quoted in the Science Careers article, “Think Globally, Act Locally” on the importance of student groups and attending conferences, like the Society of Chicanos/Hispanics Americans in the Sciences’ National Conference.

http://ugr.ucsc.edu/
Social Sciences Division

Social Sciences Undergraduate Research

In keeping with the University of California's three-part mission: research, teaching, and public service, the Division of Social Sciences has a strong history of integrating undergraduates into the research endeavor. (from Social Science Research)

For an example of Undergraduate Research in History, see the profile of Lois Rosson.

Other Research Opportunities

Here is a sampling of research opportunities and databases. Please note that we cannot guarantee the accuracy of the sites.

Databases & Comprehensive Listings
Cross-discipline
- From Pathways to Science
- UC Irvine's Opportunities Database
- CSUMB Summer Research Opportunities

Federal Agency Programs
- Internship and Fellowship Opportunities in Science with the US government
- Department of Energy's (DOE) SULI Programs – Science Undergraduate Laboratory Internships at national laboratories across the country. These Internships are run for 10 weeks during the summer. There are also opportunities during the fall and spring semesters. Internships are offered in areas such as physics, biology, chemistry, environmental and atmospheric sciences, engineering, computers applied mathematics and nuclear science.
- DOE Mickey Leland Energy Fellowship is a 10-week summer internship program that offers opportunities to minority and female students who are pursuing degrees in majors. Candidates who are selected will have the opportunity to work on...
Programs & Positions

• Programs often involve:
  • Multiple students
  • A formal application/evaluation process
  • Extra activities and/or benefits
    • May involve placement in a lab
    • Stipend, research expenses, and travel and housing (in summer)
Programs & Positions (cont.)

- Positions
  - Are often negotiated directly with a professor/mentor/supervisor
  - May be volunteer, for credit, or paid
  - May be flexible
How Do I Get Involved?
Programs & Positions

- Be focused and assertive
- You are here, you can do it!
- Get an overview of the work from the web
- Read web information thoroughly
- Apply to everything!
- Don’t take the process personally
How Do I Get Involved in a Program?

• Make sure you meet the eligibility requirements
• Meet/E-mail the contact person/coordinator well before the deadline, ask questions and for suggestions
• Notify your mentor about your application and when you’ll be asking for letters
  – See Application Tips & Deadlines webpage
UCSC Programs of Interest

STEM

• STEM Diversity Programs- Feb. deadline
  • Most are 2 years
  • CAMP (California Alliance for Minority Participation) is one year
  • Programs involve research, graduate school preparation, tutoring, journal club, social activities and more

• Research Mentoring Institute (RMI) for working on any aspect of the human genome
  • Rolling deadline
UCSC Programs of Interest

STEM

• Some classes include research
• Be sure to check your department for additional options
  • UCSC Forest Ecology Research Plot (academic year)
  • Impact Designs: Engineering and Sustainability through Student Service (IDEASS)
    • 3-quarter upper division service-learning course
UCSC Programs of Interest

STEM

• UCSC NSF Research Experience for Undergraduates (spring deadlines)

• Undergraduate Research in the Biological Effects of Climate Change

• Summer Undergraduate Research Fellowship in Information Technology (SURF-IT)

• The Lamat Summer Research Program on High Performance Computing in Astrophysics
Some Other Fun Opportunities

**STEM**

- Pinniped Cognition and Sensory Systems Lab

- Digital Arts & New Media graduate students’ Call for Undergraduate Research Assistants
  - New each quarter
  - Work on computer games, documentaries, activism, interactive outdoor installations and more

From [http://pinnipedlab.ucsc.edu/multimedia/](http://pinnipedlab.ucsc.edu/multimedia/)
UCSC Programs of Interest
Social Science & Humanities

• Learning and Experimental Economics Projects (LEEPS)
• Humanities Undergraduate Research Awards (HUGRA)
• Pathways to Research (EOP students)
• Research Mentoring Institute (RMI)
  • For working on any aspect of the human genome, including Social Sciences and Humanities
UCSC Programs of Interest
Social Sciences & Humanities

• Some classes include research
  • Psychology 194
  • ENVS Internship Program

• Be sure to check your department for additional options
UCSC Programs of Interest

Arts

• Arts Division Internship Program
• Center for Games &Playable Media
• The Cultural Arts and Diversity (CAD) Resource Center
  • Rainbow Theater
  • African-American Theater Arts Troupe
UCSC Programs of Interest

All Disciplines

• Merrill, Porter and Crown College Research Fellowships
• UCDC- UC Washington Center
• UCCS- UC Center at Sacramento
Preparing Your Application

• Fill out application completely
  • Curriculum Vitae (CV) or resume
  • A personal statement
  • Reference letters from professors, not TAs
  • See Application Tips webpage

• Review by others for grammar, style, relevance, etc.
  • Give reviewers plenty of lead time

• Submit it on time

• If there are issues, contact the coordinator

• RELAX!!
Application Tips & Deadlines

Application Tips
- Help for every step of the process from Pathways to Science
- How to effectively obtain a letter of recommendation (from UCSC STEM Diversity)
- Writing a Curriculum Vitae (CV) (from UCSC STEM Diversity)
- Writing the Curriculum Vitae (from Purdue Owl Online Writing Lab)
- Writing the Personal Statement (from Purdue Owl Online Writing Lab)
- Summer Research – Applying and Getting in (from UCSC STEM Diversity)

Application Deadlines
April, 2013
- Psychology UR Funding due 4/5
- Deans' and Chancellor's Awards due 4/8
- Arts Division Internship Application due 4/12
- UCIRA Undergraduate Action Research Grant due 4/15

http://ugr.ucsc.edu/application_info
Getting Into a Lab/Research Group

• Identify a group you are interested in
  • Seminars, talks, etc.
  • List of Professor’s research interests
  • Don’t overlook industry, non-profits, government

• Contact the professor/group leader
  • E-mails should:
    • Be formal (Dear Dr. or Professor)
    • Be specific to group (refer to paper, webpage, etc.)
    • Explain why research is critical for your goals
    • Have correct spelling and grammar
A Good Email Example

Dear Dr. Professor,

I am a (year, major) at (university) and I am writing to ask about opportunities for undergraduate research in your lab beginning (time period). I am especially interested in your work on (describe a paper or talk). I would appreciate the chance to meet with you to discuss (the topic) and possible opportunities for me to become involved in the project. I am eager to develop my research skills while an undergraduate to help me (career goal).

I have attached my CV and unofficial transcript. Please let me know if I can provide any additional information.

Sincerely,
Ambitious Student
Email address
Hi Joe,

My name is (Name) and I am a major in (name major). Is there space in your lab for an undergraduate? If so, what is the pay rate?

Thanks,

Name
Getting Into a Lab/Research Group (cont.)

• Go to office hours
  • Go right after a test
  • Be considerate
  • Show genuine interest
  • Ask about research and for advice
  • Ask how to prepare to join in the future
  • Schedule an appointment if the professor is busy
• Ask to go to lab/group meetings
  • Credit may be possible
Join a Lab or Research Group

There are many research opportunities for undergraduates at UCSC, but unfortunately not enough for every student who is interested. You will need to be dedicated and focused to find and keep a position. The advice below can help you, but does not guarantee that you will get into a lab or research group.

If you have any questions or would like to have more information, please contact:

Rebecca Anderson
Undergraduate Research Coordinator
rlanders@ucsc.edu
831-459-1284

To find out additional information for your field of study, go to the related webpage for the division/school:

Engineering
Humanities
Physical & Biological Sciences
Social Sciences

http://ugr.ucsc.edu/join_a_lab
The Independent Study Option

• **Why?**
  • When you have an idea or interest not covered in a class

• **How?**
  • Check your department's webpage and with your academic adviser for policies & procedures
  • Find a few professors with similar interests
    • Look online at their webpages
    • Read a few papers
  • Write a brief overview and timeline
The Independent Study Option (cont.)

- Contact the professor through email/office hours
  - Be formal
  - Write professional emails
  - Check grammar and spelling
  - Refer to the professor’s work or research
- Discuss your project with the professor/researcher
  - Remember he or she is an expert in this field and be respectful
  - Explain your idea and timeline
The Independent Study Option (cont.)

• Make sure you file the forms by the deadlines and get required signatures.
• Stay in touch with your faculty sponsor.
The Independent Project Option

Many students are interested in pursuing independent research projects and need to find a faculty sponsor. Listed below are some tips to help you succeed with an independent study project.

Steps to a Successful Independent Study Project

1. Check your Department's webpage to see if there is information posted about undergraduate research and/or independent study projects. Linguistics, for example, has a very useful site on undergraduate research and independent study.

2. Consider what quarter you should do your project. Independent projects take a significant amount of time. When you are planning your project, think about what other classes and personal commitments you will have that quarter.

One option, for highly motivated students with excellent time management skills, is to do the project during the UCSC Summer Session. Since you will need 6 credits to qualify for financial aid, a 2 credit independent study might be a good addition to your 5 credit class.

However, it can be difficult to find a sponsor for the summer because many professors have other time commitments. You are most likely to be successful in getting sponsorship for an independent project if you have a strong mentoring relationship with a professor.
Funding Sources

• See “Funding Your Research” for each division
• Summer internships pay for housing, travel, research expenses and a stipend
• Contact Financial Aid to see what you are eligible for
• Ask the professor, your academic adviser, and other students for suggestions
• Check your department and division webpages
College Funding

• Check the college web page
• Ask your college adviser, since not all funds are published on-line

• College funding examples:
  (this list is not comprehensive)
  • College 9/10 Student Funds (contact Bob Taylor)
  • Cowell Student Project Funds (contact Maria Zimmer, Crown Student Projects Funds (contact Cathy Murphy-Miles)
  • Kresge Student Project Funding (contact Shannon Mahoney)
  • Merrill College Special Students Projects Funds (see the College Assistant)
  • Porter- Student Project Funds and Creative & Innovative Grants (contact the Porter Student Activities Office)
  • Stevenson Research Project Funding (contact Debby Joyce)
Funding Sources- Pivot

- Database of external funding sources
- Free for UCSC students but you need to register

http://pivot.cos.com/
What Can I Do Now?

**Frosh**

- **Get good grades!**
- **Use Academic Support Programs**
  - Academic Excellence Program (ACE)
  - Learning Support Services Tutoring and Modified Supplemental Instruction (MSI)
  - Departmental tutoring
  - RAD (join all year) and/or MESA/MEP (join in fall)
- **Study in groups**
- **Go to TA and/or professor office hours**
  - Help with material
  - You’ll need LOR from professors
Academic Support Programs

Check with your academic advisor for department specific programs.

General Academic Support
Career Center—The Career Center is dedicated to providing comprehensive, quality career development and employment/internship programs and resources that prepare a diverse student/alumni community to successfully meet today’s and tomorrow’s challenges.

Disability Resource Center—The DRC’s goal is to assist the UCSC campus with equal educational access for students with disabilities.

Educational Opportunity Program—EOP provides a variety of academic and personal support programs designed to improve the retention and academic success of first-generation, low-income, or educationally disadvantaged college students. EOP serves to enhance undergraduate experiences by helping students acquire the skills to prepare for graduate programs, professional school, and future leadership roles. The Pre-Graduate Program hosts workshops every quarter.

Learning Support Services—Peer guided group sessions called Modified Supplemental Instruction (MSI) are available for selected lower and upper division undergraduate courses. Content related tutoring is available for all classes that are not supported by MSI.

Services for Transfer and Re-entry Students—STARS provides the extra academic and personal support transfer, re-entry and readmitted students may need to benefit fully from their education at UCSC whether they are full- or part-time. STARS is here to assist students with their pre-admissions questions, transfer and graduation planning.
What Can I Do Now?
Frosh (cont.)

- Join a student group
  - Community and networking
- Use the Career Center
  - Advice for choosing a major
  - Videos on webpage
- Talk to your major and college advisers
- See the UR webpage for your division
What Can I Do Now?

Sophomores & Juniors

- Keep your grades high and keep going to office hours
- See “Join a Lab or Research Group” for details
- Be persistent and assertive
- Network with friends, professors, TAs
- Ask to attend lab/group meetings if a lab is full
- Go to department seminars
- Research summer programs in early fall
  - Plan to apply to multiple summer programs
  - See Application Tips page for help getting LOR
What Can I Do Now?

Junior Transfers

• Start looking NOW
• See the Join a Lab or Research Group webpage
• Go to office hours
  • Read professors’ webpages and papers
  • Go for your current major classes and professors in related departments
  • Ask about the class, research, papers, how to get involved in the department
• Look into research classes (previous slides)
• Use campus resources, like STARS
• Form study groups
What Can I Do Now?
Seniors & Super-Seniors

• You can still try- some professors will take seniors

• Some students stay to take a light academic load and volunteer to do research

• Look into senior capstone/thesis programs

• Consider semester abroad and/or summer schools

• Look into post-baccalaureate programs

• Look into jobs, like being a tech, to get experience
What's Next?

Participating in undergraduate research is excellent preparation for graduate school or employment. Remember that your interests may evolve during and after college, and that preparation for one career will provide skills that you can use even if you end up pursuing other options later in your life.

Select one of the topics below:
- Graduate School
- Post-baccalaureate positions
- Non-profit or Industry Positions

If you are considering graduate school:
- Talk to your research mentor about options early
- Talk to your mentor and graduate students in the department about how the process works in your discipline. You might ask:
  - What schools are strongest in your field? The best researchers in your field may be at a school you haven't heard of.
  - Where does your mentor think it would be best for you to apply?
  - What schools have students you know?
  - What schools offer the best financial support?
For More Information:

• Visit the UCSC Undergraduate Research Opportunities website, ugr.ucsc.edu
• E-mail: rlanders@ucsc.edu for a meeting
• Join the list-serve on the website
• Come to Drop-in Advising, Baskin 153B
  • Monday, 3-5 PM
  • Wednesday 12-2 PM
  • Friday 10 AM-12 PM
Please fill out the evaluation and leave it up front.

Thanks!
